Besides the main functions you find in other download managers, Download Manager comes with a nice progress window with a lot of useful information, such as the remaining time, the size of the file and the speed. The progress window appears in the middle of the screen, so you can easily read it while watching the download. Also, Download Manager has a status bar that displays all the active downloads, so you can always keep track of what is being downloaded and when it will be finished. Download Manager has been designed to be very intuitive to use and simple to understand. The interface is quite user friendly. Features: In the main window you can see the status of all the downloads. You can pause, resume, stop or continue them. You can also set up your preferences and set the settings of the software as you prefer. It allows you to set the default file extension to be used for all the downloads you perform.
