Q: Simple way to read files from location I have an application that reads files from a certain location on my computer, essentially running the following program: string filename = @"C:\Temp\FileName.txt"; FileStream fs = new FileStream(filename, FileMode.Open, FileAccess.Read, FileShare.Read); StreamReader sr = new StreamReader(fs); MessageBox.Show(sr.ReadToEnd()); How can I do the same thing on my server, but with the path being C:\Folder\FileName.txt? A: Like this: string filename = @"\\myServer\Folder\FileName.txt"; Use Environment.SpecialFolder.ApplicationData to get a path to your app data directory, or SpecialFolder.CommonApplicationData to get a path to your app data directory from the user's profile. Hematologic and biochemical abnormalities in an AIDS patient with chronic idiopathic neutropenia. A 49-year-old woman with AIDS and chronic idiopathic neutropenia had a right tonsillectomy followed by an encephalopathic crisis. The postoperative courses and the results of cytochemical, microbiological, and histopathologic studies on several specimens obtained at the time of the patient's crisis are presented. Elevated neutrophil alkaline phosphatase levels and normal numbers of neutrophils in the peripheral blood suggested a population of immature, perhaps toxic, granulocytes. No microorganisms or inflammatory reactions were found in the specimens by standard 0cc13bf012
