I expected the same on all files.  
A: I had a similar issue. After researching into why both rar files were not being unpacked, I realized the RAR files were compressed at 9.7 compression, whereas the ZIP files were compressed at 4.0. That's a huge difference. If you want.rar files to be unpacked, make sure that both rar files you're trying to unpack are compressed at the same rate. I have the Dell D630 and have

just received my new headset. It is not a Dell branded headset, so I don't know which model. It has:

"Revelation-22-6-06-HD2.zip" on it. On the box there is a small square sticker with the words "Elgato" in red and underneath there is a small blue and yellow symbol.

Anyway, I've searched online and seen no others with the same model. What can I do? I can't find my Dell manual and I can't seem to find drivers or anything else to download for this headset. Can anyone help? This invention relates to a process and an apparatus for providing a uniform stream of

insulation particles from a hopper or other container in which the particles are stored, usually packed in a binder and provided in a roll, to a feed mechanism, e.g., a shaker feed mechanism, for use in a system to spray the insulation particles onto insulator boards or other objects such as in making up motor armatures, multi-conductor flex circuitry, wire conductor insulation, wire sheathing and so forth. The insulation particles are fed to the shaker feed mechanism in granular form from the hopper or container. The shaker feed mechanisms have a generally horizontal, elongated, axially

and/or circumferentially uniform chamber with a particle entry orifice extending there through, and a generally horizontal agitator shaft mounted in the chamber and being driven for rotation by a suitable motor to move an agitator blade or other metering member into and through the chamber from which it is withdrawn by a similarly driven belt or the like conveyor for supply to the entry opening of the chamber. Means such as hydraulic jacks and/or compressed air cylinders are provided to cause the agitator shaft and agitator blade to tilt the container of particles to
