It's because of the file manager. ES File Explorer is a file manager that works on both Mac and Windows. It's a very basic file manager with no browser features. Treatment of PAD-B progression by triple-antiplatelet therapy in a patient with mild to moderate hemodynamic impairment. This is a case of a patient with PAD-B disease with an insufficient drop in PAD-B score and an increase in ankle-brachial index (ABI) after the first triple antiplatelet therapy (TAPT) with aspirin, clopidogrel and cilostazol. However, this single study could not confirm the efficacy of TAPT, in this patient, so we changed to second TAPT. This patient did not experience recurrence of vascular events. These findings suggest that TAPT could be an effective method for mild to moderate hemodynamic impairment in PAD patients with partial or complete occlusion of lower limb arteries. Q: GitHub push to App Engine with Go I am trying to push my repo to app engine without having to SSH into the app to do it because the changes are not server side. I am running in the development environment and have no user account on my app engine account. When running \$ git push app.appspot.com I get the
