For the one who has the strongest will, the land of Aranthel shall be tamed. In the vast land between, three races walk upon lands: Glaciers dwellers, silver elves, and blue-blooded elders. The Glaciers elves are the first civilization that can be said to be awakened, and their lords, the Elden Lords, have also originated from their divine past. When the silver elves, who hold an advanced level of civilization, rose, all the ancient nations of Aranthel were buried under their onslaught. Their defeat resulted in the degeneration of their culture and eventually led to the forsaking of the knowledge of their former nobility. The blue-blooded elders have come to the Lands Between to seek their glorious life. The story of the Lands Between begins from here. The present invention relates to a method of and to apparatus for calculating the position of a moving member in a direction perpendicular to the moving direction. An example of such a moving member is a rotor disc with respect to which an actuator can cause the rotor disc to rotate about an axis, as is the case in most conventional hard disc drives. The position of the rotor disc is determined, for example, by a so-called closed loop encoder, i.e. an arrangement with light sources and detectors which measure the position in a number of different directions and calculates the position from the differences between the detected light intensities. The light source/detector pairs can be separated by a distance of a few wavelengths, as a result of which highly accurate position determination becomes possible. However, as the moving member moves towards the light sources and detectors, the phase shift errors increase and the resolution thereof becomes impaired. It is a further disadvantage of known arrangements that, in order to prevent the moving member from slipping relative to the encoder, the encoder is mounted on a carrier which is fixedly connected to the moving member. Thus, because of a common, rigid connection, there is a permanent axial displacement which depends on the amount of load on the moving member. The axial displacement may be compensated for by an adjustment of the light sources and detectors, such that there is a constant light intensity at a given point. However, this presupposes that there are no changes in the situation of the moving member. In fact, if the moving member is subjected to a load (for example when it is moving past a plurality of surface features on the magnetic medium of the hard disc

## Features Key:

A Huge and New Fantasy World Gorgeous graphics, a massive world, and the effects of time. Characters that appear by connecting the Lands Between are all very vivid. While you travel across vast fields filled with rare monsters, combat techniques that strike from the shadows, and enter large dungeons, you will feel the power of the coming of the Old Gods.

## The Story

Your predecessor, a renowned telepath, went missing. Although we caught a glimpse of him in his final moments, we have not received any information since. We need to contact him at once. You have been chosen to save his life. Are you ready?

To the Lands Between, who only existed for a brief moment. Our empire had fallen apart, and the people that remain were plundered and manipulated. Neither the humans nor the Orcs ventured out beyond the walls that protected them. A vast world was created.

Then, some fifteen years ago, humans appeared from the Darkness here.
Even now, no one knows the exact reason for their appearance.

They descended upon the Lands Between. They massacred the inhabitants and looted the territory with their monstrous strength.

With a feeling of boundless cruelty, they seem to be brimming with anger. Their barbaric battle cries remind us of the end of the world. Although their appearance has been a mystery from the outset, their movements have become more and more identifiable, their apparent strength in the Legends increases by the day, and the rumors of secret weapons grow to an ominous extreme.

With that, they began to explore the Lands Between, and in response, the Orcs stepped into action for the first time in history.

We were faced with a terrible war. The Orcs perceived us to be the enemy and cut off our ties with the Lands Between. You are the last known survivor of the Elden Ring.

Some hope to search for you among humanity. Other, fearless Orcs are on a terrifying mission to eradicate you who demand the Elden Ring.

## A Fantasy World Made with Vitality

You are a traveler from the Lands Between.
Travel to the Lands Beyond, and rescue your predecessor!

## What's new in Elden Ring:

**Thu, 23 Jul 2014 10:55:31 +0000release date pushed back to Sept 2015**

**We'll be pushing the release date back about a month to Sept 2015 (wich will be just in time for the next CS:GO beta)**

**But it also means we're gonna need a little bit of time to polish some stuff. 2 months isn't exactly a lot, but it will be worth it.**

**Sorry again for the long delay and for so many problems we suffered behind the scenes. We want to have a final release as good as it can be and the pressure to publish isn't really helping.**

**Thu, 23 Jul 2014 09:33:59 +0000>Q: strcat using a pointer Not sure if I did it correctly this time but I think I did. int *str_cat(int *first, int *last) { int first_x, last_x; first_x = first->x; last_x = last->x; int *dest = new int; strcat(dest,first_x); *first = *dest; return first; } From my understanding, this returns the data of 'dest' so first_x should be first, but it is only called first;dest because dest doesn't change the value. The other way around, it works fine. It works with just strcat(), is there a way of doing it with strncat()? unsigned int *strn_cat(unsigned *first, unsigned *last) {**
