Random serial number. An overview of clinical trials in emergency medicine: A 2000 to 2015 literature review. Clinical trials are a valuable method for evaluating new treatments. The aim of this literature review was to characterize clinical trials conducted in emergency medicine. This review describes the inclusion criteria, location, and length of clinical trials completed from January 1, 2000, to December 31, 2015, using English language articles. We also assessed the frequency of randomized controlled trials, studied the publication year of clinical trials, and evaluated the impact of clinical

---

trials on current treatment practices. A total of 5182 articles were reviewed, of which 124 focused on clinical trials. A total of 682 trials, including 49% published in the past 5 years, were completed, accounting for 48% of all published trials. The distribution of clinical trials was not uniform throughout time, with a steady increase in recent years. The vast majority of clinical trials were in the field of anesthesiology (34%), critical care (17%), trauma (15%), and emergency medicine (14%). Between 2001 and 2015, the number of randomized controlled trials in emergency medicine increased considerably, from 16 trials in 2001 to 138 trials in 2015. The number of nonrandomized clinical trials has also
