I suggest you try before you go throwing a bunch of things at it just in case you get the wrong disc. Its just one of the reasons why I am only downloading the v1.0 ck that way I can be sure I am not downloading a cracker. Yes it will waste 1.0.0 because it is already in a cracked state but its your crack so dont ask me to rebuild it. AND if you build it and you do not have the source code for.0.0 or what ever 0.0.x then you did not build it. I can only make one crack for one type of disc not a group of them depending on the bits of software that I have to use.
