

Catastronauts Free Download [PC] ((FREE))

catastronauts is a fast-paced 1-4 multiplayer action game in which players become a crew of intergalactic spacefarers who must work together to destroy an attacking enemy fleet, whilst frantically struggling to keep their own ship intact. co-ordination, co-operation and decisiveness are essential to victory, as multiple tasks need to be taken care of across the vessel. whilst catastronauts may have a fairly simple visual style, it involves a huge amount of content for a game of this size, with a player-made galaxy comprising over 200 planets, moons and asteroids to explore. each player has a ship, over 200 weapons to use against the enemies, a large variety of shields, health, speed and shields, and a crew of up to four players to control. in addition to the planets, moons and asteroids, each player can perform a range of actions within the game. by pressing buttons or rotating the main thumbstick, players move their ship in space, launch weapons, lock on to enemies, change shields, upgrade weapons, assign crew to different tasks and more. catastronauts is a highly customisable multiplayer game, with many players choosing to modify it extensively with third-party mods. these mods make the game look better, add new features, alter gameplay mechanics and provide new content. most importantly, they allow players to customise their experience and make the game fun for themselves. by modding, players can create a game that's more fun, challenging and rewarding. we know that we are a one-stop shop for mod developers, and we'd like to work with all of you to create the best possible game.
